## DETAILED ACTION

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1 – 9, 16 – 20 and 21 – 28, drawn to maintaining of distributed database data, classified in class 707, subclass 10.
  - II. Claims 10 - 12, drawn to building a table of data entries, i.e., generating database or data structure, classified in class 707, subclass 102.
  - III. Claims 13 - 15, drawn to reading a section of a table of data entries and sorting the data entries, classified in class 707, subclass 7.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I, Group II and Group III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention has separate utility such as follow:

Group I: A method of maintaining and distributing database data.

Group II: A method of building a table of data entries, i.e., generating database or data structure.

Group III: A method of reading a section of a table of data entries and sorting the data entries.

See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II and III, the search required for Group II is not required for Groups I and III and the search required for Group III is not required for Groups I and II, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
